Options to Increase Density

The rezoning of certain existing residential/mixed use sites to a higher density strategy involves the up-zoning of certain sites to R-3 (multi-family residential— maximum Density= 1 unit/ 1,500 square feet parcel area), thus providing an increased density. In addition an Affordable Housing Overlay District (AHOD) could also be applied to these sites which would provide an incentive to enhance the feasibility of an affordable housing project. The AHOD would allow a further 50% increase in the allowed density if the units are affordable to moderate or lower income households.
